

St Cloud Sprinkler Save

04/29/2012

A dryer fire in the basement laundry room of a Group Home caused an estimated \$12,000 in damage. A staff member discovered the fire and was able to get all the residents out safely. The sprinkler system activated and was able to control the fire until firefighters completed final extinguishment. Two residents were relocated to relative's homes and the remaining two were provided temporary housing by Red Cross. There were no injuries.
