

## St Cloud Sprinkler Save

07/15/2012

The St. Cloud Fire Dept. responded to a water-flow auto alarm at the Holiday Inn at 12:16 Hours Sunday 7/15/12. Upon arrival fire crews found water flowing from under the door to one of the second floor hotel suites and the room smoke alarm sounding.

A single sprinkler head had operated and extinguished a fire that involved the bed, nightstand, lamp, phone & alarm clock. The occupants had checked out of the room an hour before the fire. The Insurance Company is currently investigating the fire.

Except for the room of origin and carpet drying procedures in the 8 surrounding rooms, the hotel was back in full operation Monday morning.
